

The Scientific Challenge: From Basic Science to the Clinic

CIRM Meeting for ICOC and Public

July 13, 2006

J. David Gladstone Institutes

July 13, 2006

California Institute For Regenerative Medicine

Questions for Discussion

- What scientific strategies will be required to advance stem cell research from the laboratory to the clinic?
- Are there special projects or approaches for which CIRM can make a unique contribution?

Questions for Discussion (cont'd)

- What is CIRM's role in supporting clinical research and/or the clinical development of therapies?
- What tools and technologies do we need?
What are the needs for trained personnel?

Questions for Discussion (cont'd)

- How can CIRM facilitate partnerships with other organizations, in the US and abroad?
